The three kings

(Klaudia Sirotová)

Once there was a king and a queen. They decided that they want to have a new king on the throne. They have a princess, and they wanted to find a rich and generous prince for her. They sent the invitations to 46 kingdoms. But only a half came to the kings . How many kings came? These kings brought the gifts for princess. Every king brought 1000 gold coins. How much money did the princess get? Princess liked the last three kings. But she did not know which is beautiful. When it was a princess birthday one king decided to get a princess a present. He let her sew a dress from 3 meters blue dress material,4 meters white dress material and 5 meters green dress material and 1 meters transparent dress material. How many meters of material did the tailor need? Princess was very happy she liked the present and married him. They invited to the wedding people from 13 kingdoms, from each one 53 people. How many people came the wedding? And prince with princess live happy for a long time. The End.
