

# Barbara

(Adriána Števaňáková)

Far far away there lived a small girl who was very lonely. She had a brother, who has already started to work. She was called Barbara. She was 3 years old. Nobody liked her. She was learning how to read and how to write for 7 days. She knew to read very well very quickly, but the writing was a problem for her. She was a good student.

She has learnt in 30s to write one letter. How many minutes did it take her to learn the whole alphabet, which has 46 signs? When she grew up, she had to pick up the apples. There were 67 apples on each tree. How many apples did she pick up from the fifteen apple trees if she ate 15 apples? How many baskets did she need, if in each one it could be 27 apples? When Barbara was 25 years old, she started to learn how to repair the car. There was a very bad car. She needed 110 nails, but she had only 28 nails. How many nails were missing? And this is the end of the story for today.
