

The ugly duckling

(Dominika Bumbáková)

Once there lived a duck who was expecting the small ducklings. How long does it take when the small duckling were born? The duck was sitting on the eggs for 2 months. The first month had 31 days. The second had about 3 days less. When the small ducklings were born, their mother was very happy. She saw that one egg is still unbroken. So she was waiting and waiting. Eventually the ugly duckling was born from this egg. Everybody was flouting on it. Animals on the farm decided that the ugly duckling has to go out of the farm. In the lake there were 180 ducks and 75% of ducks were for moving out. How many ducks were against moving out? When the ugly duckling heard it, it packed and went away. It was walking 72 hours. How many days is it? Then he saw a swan Sela. They introduced to each other and they became the best friends. The duckling wanted to be a swan. It found out on the internet, when it wanted to be a swan, it should be 3600 g heavy. But it was only 1200 g heavy. How many grams does it have to fatten out? So it started to eat: 5 rolls (one roll 20g), 1 bread (500g), 1 hot- dog (100g), 5 dcl of cola (20g), chips (120 g), meat (180g). How many grams does the duckling have to fatten out? The duckling still doesn't change, so it invited Sela on a picnic. It ate there a hamburger (1000 g) and 300 grams of roasted sausage. Sela was surprised how much food the duckling ate. As they were sitting near the lake, Sela shouted: "You are a swan!" When the duckling looked into the water, it saw a beautiful white face with a nice red mandible. At the moment he asked Sela hand. She didn't hesitate and said yes.
