

The fairy tale about king and queen

(Michal Šuhaj)

Once there was a big kingdom and in this big kingdom there was a castle with thirteen towers in the north, three towers were in the south and eight towers were in the east. How many towers were together? Three towers on every side were destroyed by dragon. How many towers are still here? How many % towers is still remaining? In the castle there lived a very rich king with his beautiful queen. King and queen had crowns, and on them there were 25 diamonds. Dragon stole 5 diamonds from the king's crown and kidnapped the queen with her crown. How many diamonds did he steal, when on the queen's crown were 10 diamonds? King decided to save the queen from the fire cave, where the bad dragon lived. „Heeey, dragon, give me my wife, because I'll stab you 6-times and from each hole will flow out 5 litres of blood.“ How many litres of blood will flow out? Dragon said, that he'll give the queen to him when he guess, how old is dragon. „My dad was 325 years old when I was born. My dad died before 105 years. How old am I, if my dad died in age of 56? King said correct answer and he could go with the queen and the diamonds. They lived together till they were 90 years old.
