

Cinderella

(Klaudia Havrilová)

Far faraway lived a little girl called Cinderella. When she was a child her mother died. From that time lapsed 15 years. How old is Cinderella now? Her father got married again. His new wife had two daughters. Elena was 14 and Mirka was 18 years old. How old are they together? They were ugly, lazy and very bad. One day they got the invitation to the ball, because the prince wanted to find the fiancée. There were four invitations also one for Cinderella. But the stepmother said: You won't go, if you don't count the task. $17.5 + 66.2$. So many you sort out the peas from the cinder. When you do that you can go to the ball. When stepmother with her daughters went out, she started to count. Help her to count! When she knew the result she started to cry and said I can't do it on time! Right now the pigeons knocked on the window. She opened the window and there were 10 white pigeons and 2 times more grey pigeons. How many pigeons flew into the house? They started to sort out the peas. Cinderella took the beautiful dress, which she was hiding in the wardrobe. When she came in the ball, everybody was amazed with her beauty. The prince came and asked her for a dance. He fell in love with her for the first sight. He asked her: Do you marry me? She said yes, but you have to tell me, how many is: $5/11.(1/2 + 2/1)$. He told her the correct result and they lived happily ever after.
