Once upon a time there was a dog Dunco. He lived near the Michal. The dog is very scary. One day the dog bite 316 people, 75% of people were angry.

How many people were angry? One morning an aunt went to the shop and Dunco jumped on her. She had 4 liters of blood, but when Dunco bite her, she lost 17% of blood. How many liters of blood did she lose? His neighbour dog Rexo was a very good but he always eats. During a day he ate 6 meals. Each meal weighs 800grams. How many grams of food did he eat, if one year lasts 365days?
