

Brave Jacob

(Stanislav Turošák)

Far far away there lived a boy called Jacob. He wanted to be a priest but he didn't have money. He was poor and sad. One day when he was coming back from the market he saw a mirror which said: If you want to be rich you must go

500 m straight away and then go 90 km to the west. How many metres does he have to go? As he was walking, he saw a sign pay attention! Germanic tribes. A few minutes later he saw a boy called Andrew and he says: When your Brother is 25 and sister is 21 more. How old is your sister? He answered correctly so he continued in his journey. When he was at the end, he saw a big treasure and a giant dragon in front of the him. They started to fight. He defeated the dragon. He was very good friend with Andrew and he became a priest.
